

## **Port Louis Marina Environmental Policy**

Port Louis Marina is committed to minimising the impact of its activities on the environment. This Policy Statement sets out how we will work towards achieving our environmental objectives.

- Where possible we will identify opportunities to adopt best practice
- We will ensure that marina boats are fuelled safely and responsibly to avoid spillages and pollution
- We will minimise the use of electricity in all of our activities. For example; turning off lights, replacing old light bulbs with energy efficient models
- We will minimise the use of water in all of our activities. For example; turning off taps when not in use
- We will minimise the creation of waste. For example; we will only print and photocopy if absolutely essential and then print double-sided
- Where possible, we will use email rather than printed materials to communicate and promote our activities
- We will provide suitable containers for the disposal of hazardous waste streams
- We will endeavour to take a sustainable approach to our operations
- We will publicise our environmental commitment and promote sustainability amongst our members and visitors on our website and marina notice boards
- We will measure our progress and review this policy on an annual basis
